

Family Partners Child Care Specialists

Description:

The responsibility of a child care center is much more involved today than it used to be. In the past, grandparents and family members helped parents raise their children. Today's lifestyle seems to make family options less available. Parents need to be able to rely on their child care center for advice, assurance and instruction regarding their children.

Family Partners maintains colorful, cheerful, enriching child development centers. Family Partners cares for children ranging in age from 6 weeks through 12 years. We understand and practice solid child development research and principles; communicate progress and concerns with the parents; provide a clean and safe environment; and participate in and support the community.
